FINAL REPORT RUSSIA ESSEN WELDING & CUTTING

5th RUSSIA ESSEN WELDING & CUTTING:

Exhibitors praise successful concept

Quintet of five theme-related trade fairs attract 10,580 visitors

The RUSSIA ESSEN WELDING & CUTTING has established itself in Moscow: the subsidiary event of the SCHWEISSEN & SCHNEIDEN brought the international know-how of the joining, cutting and surfacing industry to Russia for the fifth time. Exhibitors from all over the world presented their latest products and services from 25 to 28 June 2013. 10,850 trade visitors obtained information on technical innovations at the trade fair and its four parallel events Wire Russia, Metallurgy-Litmash, Tube Russia, as well as Aluminium/Non Ferrous.

The synergetic effects of the theme-related fair quintet offered the visitors a comprehensive overview of the market. Providers of high-quality joining solutions used the opportunity to enter a growth market with enormous potential, above all in the sectors plant and mechanical engineering as well as infrastructure (GTAI, July 2013). The concept of the organisers Messe Essen, Messe Düsseldorf Moscow and the German Welding Society (DVS – Deutscher Verband für Schweißen und verwandte Verfahren e.V.) therefore received great praise from the exhibitors – including prestigious world trade organisations such as the International Wire & Machinery Association (IWMA) and the International Tube Association (ITA).

With an extensive supporting programme the RUSSIA ESSEN WELDING & CUTTING also promoted the professional exchange of views and experience between manufacturers and users. The National Association of NDT and Welding (NAKS), which acted as the Russian fair partner and staged the conference "Welding: Looking into the Future 2013" together with the DVS on the first day of the fair, also provided valuable expertise and important domestic contacts. Participants gained a comprehensive insight into the trends and development opportunities of the welding market in Russia. The "Quality Day" was another informative focal point, which concentrated on related processes such as soldering, heat treatment and thermal spraying.

Since 2007, the RUSSIA ESSEN WELDING & CUTTING, which now takes place every two years, has been part of the product family SCHWEISSEN & SCHNEIDEN, which has global importance. With the five offshoot events of the world's leading fair in Essen, Messe Essen, the DVS and their partners in the joining, cutting and surfacing trade world are opening up the promising and investment-friendly markets of the BRIC states and the Arab world.

The next dates of the SCHWEISSEN & SCHNEIDEN and its events abroad:

SCHWEISSEN & SCHNEIDEN 2013, No. 1 in the world
Essen, Germany, 16 to 21 September 2013
