

Essen, April 13, 2015

In the Shanghai New International Expo Center from June 16 to 19, 2015:

Anniversary for BEIJING ESSEN WELDING & CUTTING

For the 20th Time, the Sector Will Congregate at the Leading Trade Fair for the Asian Region

Asia's most important trade fair for the sector dealing with joining, cutting and surfacing technologies will celebrate an anniversary with a zero: From June 16 to 19, 2015, BEIJING ESSEN WELDING & CUTTING will take place for the 20th time. Around 900 exhibitors will present their products and services on over 80,000 square metres in the Shanghai New International Expo Center. These will include not only installations and equipment but also systems for computer-aided production, measuring technology and workplace equipment.

Products relating to all aspects of welding, cutting and joining are extremely popular in China: With a monthly production of over 65 million tonnes of steel, the country is the worldwide leader and has a corresponding need for further processing. BEIJING ESSEN WELDING & CUTTING will offer the visitors an ideal platform in order to obtain information about innovations for the key technologies of joining, cutting and surfacing, to exchange ideas and to place orders. As the second-largest fair in the sector directly behind the premier global fair SCHWEISSEN & SCHNEIDEN (Essen/Germany), BEIJING ESSEN WELDING & CUTTING has positioned itself as an indispensable platform.

Over 30 Exhibitors Will Present Products "Made in Germany" Together

For foreign companies, BEIJING ESSEN WELDING & CUTTING will be an important platform in order to introduce themselves in this Asian growth region and to consolidate business relations. A large number of international cooperative booths will offer firms the possibility of giving compact overviews of their services to the trade visitors. On the cooperative area of the Federal Republic of Germany which will be promoted by the Federal Ministry for Economic Affairs, over 30 manufacturers will show products and services "Made in Germany".

BEIJING ESSEN WELDING & CUTTING will be staged in cooperation between Messe Essen, the Chinese Mechanical Engineering Society and the German Welding Society (DVS). The partners will organise a specialist supporting programme in 2015, too. For example, experts will take up topical subjects in the sector in forums and will pass on their know-how.
