September 15 to 17, 2015

## The DVS EXPO Will Focus on Robotics and Virtual Welding Trainers

Exhibition Will Accompany the DVS CONGRESS - The Closing Date for Registration is February 27

Just over half a year before the DVS EXPO 2015, the preparations for the trade exhibition for joining, cutting and surfacing are going into crunch mode. The closing date for registration is February 27. The planning stage will begin thereafter. A large number of major players in the sector such as Cloos, 3M, EWM and Fronius are already definite participants. From September 15 to 17, Messe Essen will accompany the DVS CONGRESS in Nuremberg with the DVS EXPO. The subjects of robotics and virtual welding trainers will be main focal points of the exhibition.

With the successful duo consisting of the DVS CONGRESS and the DVS EXPO, DVS - Deutscher Verband für Schweißen und verwandte Verfahren e. V. ("German Welding Society") and Messe Essen have created a globally unique meeting place for experts which connects sectoral knowledge and the market in a way appropriate for the target groups. After the successful premiere in Hamburg in 2011, the opportunity to reach a top-class, international trade public will be offered to the sector in Nuremberg this year.

On 3,500 square metres, companies will be able to introduce the latest solutions for joining, cutting and surfacing to around 3,500 expected trade visitors. In this respect, two attractive joint areas will be dedicated exclusively to the subjects of "Robots in Welding Technology" and "Virtual Welding Trainer Systems". The presentation of products ready for the market will supplement the exchange of knowledge at the specialist convention "ROBOTS 2015" with the first DVS Robot Welding Competition and the "International Conference Welding Trainer 2015 - The Future of Education".

In addition, DVS will offer exhibitors at the DVS EXPO the opportunities to actively participate in the introduction programme and to inform visitors about innovations and solution ideas in the lecture rooms at the congress.
