In the New China International Exhibition Center Beijing

## BEIJING ESSEN WELDING & CUTTING Continues Its Success Story

### Around 1,000 Exhibitors at the Leading Trade Fair in the Asian Region

From June 14 to 17, 2016, BEIJING ESSEN WELDING & CUTTING will take place for the 21st time. Asia's most important trade fair for the sector relating to joining, cutting and surfacing technologies will prove its leading position once again this year: Around 1,000 exhibitors will present their products and services on over 90,000 square metres in the New China International Exhibition Center. These will include not only installations and equipment but also systems for computer-assisted fabrication, measuring technology and the equipping of workplaces.

China is the internationally leading steel producer: Around 800 million tonnes of crude steel and thus nearly half of the worldwide production were manufactured in the Middle Kingdom in 2015. This is resulting in a strong demand for products and services relating to all aspects of joining, cutting and surfacing. BEIJING ESSEN WELDING & CUTTING will offer visitors an ideal platform to obtain information about innovations of these key technologies, to exchange ideas and to place orders.

### Cooperative Booth Called "Made in Germany" with 22 Exhibitors

At the Asian trade fair, German companies will be given the opportunities to establish important contacts in this growth region and to intensify their business relations.

22 companies will present themselves on the Federal Republic of Germany's booth which will be promoted by the Federal Ministry for Economic Affairs and Energy. BEIJING ESSEN WELDING & CUTTING, a subsidiary event of the premier global fair SCHWEISSEN & SCHNEIDEN (in Germany in 2017), is being organised in cooperation between Messe Essen, the Chinese Mechanical Engineering Society and the German Welding Society (DVS).
